## WORK EXPERIENCE

---

### Java Development Intern

**TechnoHacks edutech**  
Nashik, Maharashtra

Aug 2023 - Sep 2023

### Java Fullstack Developer

**Software Engineer & Project Lead**  
**Leanquality Solution India Pvt Ltd.**  
Pune, Maharashtra

June 2025 - Present

## PROJECTS

---

### Restaurant Web Application

- This project is completely based on Java Enterprise Edition (JEE) which is a web application.
- The Restaurant Web Application is a Java-based project developed to provide a user-friendly and interactive platform for managing restaurant-related activities.
- The project follows the Model-View-Controller (MVC) design pattern for a structured and organized development approach.
- It has been designed in layers (Controller, Service, Dao, Model) which makes it more efficient and maintainable.
- Restaurant Service: Manages restaurant-related functionalities such as menu items, orders, and reservations.
- Testimonials: Allows customers to leave feedback and testimonials.
- Admin Panel: Provides administrative functionalities for managing users, menus, orders, and other aspects of the system.
- Login/Logout: Facilitates user authentication and session management.
- Change Password: Allows users to update their passwords securely.
- Contact: Provides contact information and a form for customer inquiries.
- Table Booking: Allows users to reserve tables at the restaurant.
- About: Displays information about the restaurant, its history, and mission.
- Menu: Shows the restaurant's menu items categorized by type.
- Chef Team: Introduces the chef team with their profiles and specialties.

### Taxi Booking Web Application

- This project is a Taxi Booking System built using Spring Boot 3.2.5 with Java 17 and Jakarta API.
- The application includes various features like user authentication, file uploading, car booking, and management.
- It employs MySQL for the database, Thymeleaf for the front-end, and runs on a Tomcat Server.
- The project follows the Model-View-Controller (MVC) design pattern for a structured and organized development.
- It has been designed in layers (Controller, Service, Dao, Model) which makes it more efficient and maintainable.
- Admin Panel: Provides administrative functionalities for managing users, booking, services, and other aspects of the system.
- Login/Logout: Facilitates user authentication and session management.
- Change Password: Allows users to update their passwords securely.
- Contact: Provides contact information and a form for customer inquiries.
- Taxi Booking: Allows users to book a taxi.
- About: Displays information about the taxi, its history, and mission.
